

Fauna Spotting & Catching

Construction & Development Sites

Land clearing and vegetation removal poses significant risks to native wildlife and is governed by local, state and federal legislation.

EnviroAg Australia has assisted a wide range of clients by providing fauna spotter catchers to oversee and advise clearing activities to ensure positive environmental outcomes.

Our Government Permits:

- QLD—Corporate Rehabilitation Permit (fauna spotter endorsed)
- NSW—Animal Research Authority Permit; and
- NT—Permit to Take or Interfere with Wildlife.

Our highly trained and experienced spotter catchers have been engaged with Tier 1 and 2 companies on various construction sites throughout QLD, NT and NSW. Our staff have provided spotter catcher services to a wide range of projects from small developments to large scale CSG operations.

Contact **EnviroAg** today to discuss how we can assist you.
