

Disturbed Land Rehabilitation

Assessment, Rehabilitation & Monitoring Plans

Approval conditions set out by the QLD and NSW State governments surround vegetation clearing and land disturbance.

These activities are associated with gas field and petroleum lease operations, construction sites, and new developments. They require appropriate assessment, reinforced by:

- Remediation;
- Rehabilitation;
- Recovery; and
- Monitoring Plans.

Rehabilitation is time dependent, and site-specific remediation practices must be determined prior to implementation.

Benefits Of Using EnviroAg

EnviroAg has experience in all aspects of land rehabilitation and can provide a 'net environmental benefit' through application of best practice remediation, management and monitoring.

Our experience in land rehabilitation enables us to efficiently achieve large scale remediation goals in accordance with your approval conditions.

Contact **EnviroAg** today to discuss how we can assist you.
